A Great Australian Story

Delivering comfortable, durable work boots

Our story began in Western Australia, and we've since grown to become Australia's leading manufacturer of work safety boots. Nothing beats on the job experience. Steel Blue have been perfecting our craft of making the best boots since 1995, and we're not done yet.

Our work boots are constructed from premium materials to support you to be the best at what you do. Our Trisole® Comfort Technology soling system is the foundation for great foot health. Every pair of our men's and women's work boots includes a 30-Day 100% Comfort Guarantee, and our boots are endorsed by the Australian Physiotherapy Association (APA).

Caring about the job at hand means caring about the products you use. While you're busy working hard, we're working on reducing the energy, water and chemicals used in our supply chain and manufacturing processes.

As a manufacturer and wholesaler, we sell our safety boots to authorised Steel Blue distributors so that you have more choices on where you can be fitted in the right boots for your craft.

Australian owned and designed, our safety boots are now worn all over the world.

100% Comfort Guaranteed

When you're good at your craft, you guarantee the quality of your work. Steel Blue takes the same approach, standing behind our boots since the beginning with our comfort guarantee.

That's a 30-day, 100% Guarantee on all Steel Blue boots.

You use the best tools and materials, and so do we. Our range of comfortable, lightweight, premium boots are designed for comfort, durability, and choice.

If you're not happy with your boots, simply return them to your store of purchase and we'll replace or refund them in accordance with our policies.

Made for you

Looking after your health means you can perform your craft at the highest level.

Steel Blue are the only work boots endorsed by the Australian Physiotherapy Association. We support you to be at your best, time and time again. Our boots are specifically designed to protect your ankles, knees, hips, and spine from stress-related injuries.

Endorsed by:

Safety Standards

Our safety boots comply with Australian Safety Footwear Standards AS2210.3. Steel Blue's soft toe (non-safety) work boots also comply with Australian Safety Standard AS2210.5

Boot Features

Toe Cap

Steel Toe Cap: Hardened steel caps for maximum protection

Composite Toe Cap: The non-metallic, airport friendly alternative

Soft Toe: Where toe protection is not needed

Toe Cover

Bump Cap: Moulded leather protection across the toe area

Scuff Cap: Low profile leather protection with more coverage

Scuff Guard: Low-profile for additional protection

Conductivity

Anti-Static: Reducing ignition hazards

Electrical Hazard: Added electric shock protection

Resistance

Water Resistant: Repels water from the surface

Waterproof: The best choice for wet and muddy work

Penetration Resistant: Puncture proof steel midsole

Chemical Resistant: Effective against caustic soda and sulphuric acid

Met-Guard: Top impact protection to a drop force of 100 joules

Slip & Oil Resistant: Designed to exceed the slip resistance requirements in both the AS 2210.3 and EN ISO 20345

Style

Lace-Up: Classic style for a comfy fit

Pull-On: Easy access boots with an elastic side

Zip-Sided: Quick to remove and put back on

Spin-FX™: Precision fastening dial that's easy to adjust

Fit

Ladies Fit: A true ladies fit specifically designed for women's feet

Material

Leather: Premium, ethically sourced leather

Vegan: Water resistant microfibre that is vegan friendly

Outsole

TPU: Tough all-rounder, suiting most work environments

Nitrile: Extreme heat resistance up to 300°C

Innovation

GraphTEC™: Enhanced abrasion resistance

Travel

Airport Friendly: To get through security without hassle

Feel Good

Charity Boot: \$10 from the sale of each pair of charity boots donated to Beyond Blue or Breast Cancer Care WA

Innovations

Trisole® Comfort Technology

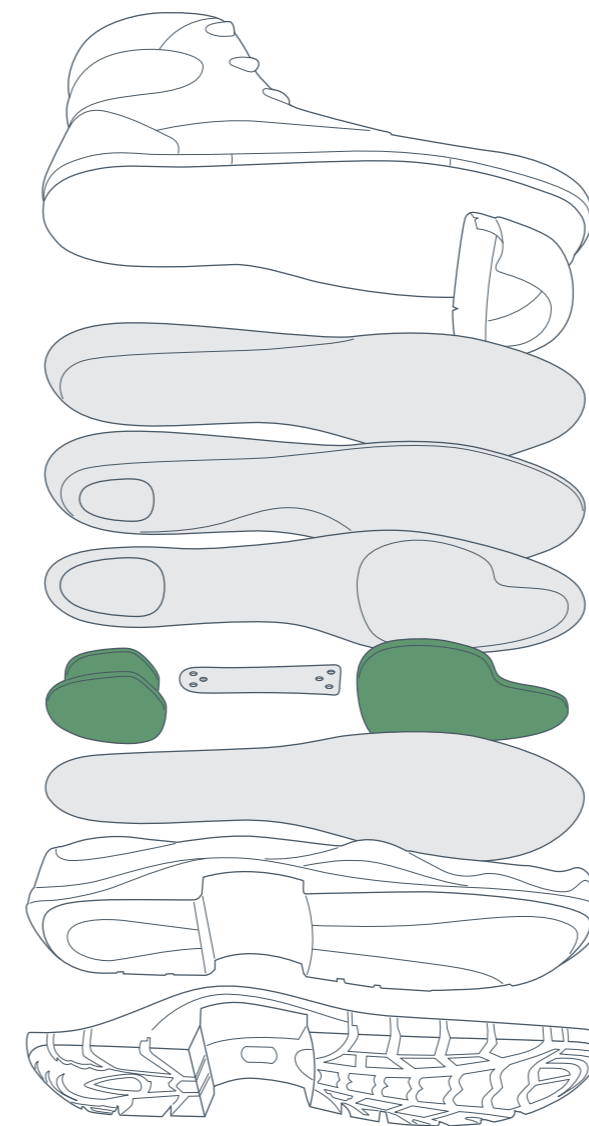

Keeps you on your feet

Whatever you're doing, your Steel Blues help you do it well.

Our Trisole® Comfort Technology eases the load on your lower back, knees, hips, and ankles, to keep you on your feet, longer. A self-moulding footbed supports the arch further to shield against stress injuries and foot fatigue.

The boots are built to last in the toughest work environments, with shock absorbing soles providing slip and heat resistance. Check the boot features to find a pair that's right for you.

- + Premium, water resistant leather upper and top quality internal linings
- + Choice of steel, composite or soft toe cap with edge protector
- + Footbed top cover using abrasion resistant, high wicking material
- + Polyurethane footbed
- + Flexible anti-microbial insole with flex perforations to the forepart
- + Support shank
- + Energy absorbing, anti-bacterial PORON® insert
- + Penetration resistant midsole on selected models
- + Lightweight, shock absorbing TPU thermoplastic polyurethane midsole
- + Strong, long-wearing TPU or heat resistant nitrile rubber outsole

Met-Guard Impact Protection

The Met-Guard is designed for miners, factory hands, drillers and others who need extra impact protection. The Met-Guard covers the metatarsal area on the top of the foot. This reduces the risk of impact injuries without compromising on comfort.

Look for the Met-Guard icon

To find products that include extra impact protection.

Met-Guard

Prevents injury from falling objects at a drop force of 100 joules.

Shock absorption

The Met-Guard provides a protective barrier that absorbs impact while supporting the natural movement of the foot.

Fully flexible

The flexible guard doesn't restrict movement, to maintain comfort with every step.

Steel Toe Cap

Hardened steel caps for maximum protection

A popular choice on worksites, our steel toe cap safety boots are designed to meet Australian Safety Standards 2210.3, offering the best protection for your toes.

We test against corrosion, impact compression and the internal dimensions so you can be confident our caps have you covered. Steel Blues with steel toe caps can resist a drop force of 200J, 15kN of crushing objects, nail gun punctures and power saw cuts.

Composite Toe Cap

The non-metallic, airport friendly alternative

Great for FIFO workers, our composite caps meet Australian Safety Standards 2210.3 to prevent injuries from falling objects at a drop force of 200J and 15kN crushing objects.

In addition to making security checks more hassle free, these pioneering caps are electrically non-conductive. Composite toe caps are also durable, rebounding after compression, can be x-rayed, won't rust, and insulate against heat and cold.

TPU Outsole

Tough all-rounder, suiting most work environments

Our Thermoplastic Polyurethane (TPU) outsole is a popular choice for most worksites. The lightweight, slip resistant option is heat resistant up to 130°C. TPU outsoles are also extremely tough providing a high tolerance against cuts, abrasion, splitting and cracking, as well as a high resistance to most oils and chemicals. Those needing heat resistance beyond 130°C should consider nitrile outsole options.

Nitrile Outsole

Extreme hot contact up to 300°C

The nitrile outsole is chemical resistant and provides extreme heat protection up to 300°C for those treading on hot objects. There is a 60-second threshold before the heat resistant rubber reaches melting point.

Anti-Static

Reducing ignition hazards

Most Steel Blue boots are anti-static to reduce the risk of ignition hazards such as flammable materials and gases. They dissipate the amount of static electricity build-up on your body, conducting it safely into the ground through the soles of your boots. Important for those working around flammable materials or with sensitive electronic equipment.

Electrical Hazard

Added electric shock protection

Our Electrical Hazard boots are non-conductive to help protect the wearer from hazardous step potential. This is the difference in electrical potential between the feet while standing on the ground. These Steel Blue boots are clearly marked and have a distinct yellow colour plug in the rubber sole. This footwear is not suitable where anti-static properties are needed.

Please note: Electrical Hazard (EH) footwear should only be used along with primary protective equipment in areas where there is a need to reduce the risk of electric shock. EH safety shoes should never be used as the primary source of protection in an electrical hazard environment. Other methods such as maintaining appropriate distances, use of isolation methods and use of grounding methods for step voltage control should be considered to provide additional protection. For more information, visit steelblue.com.

Water-resistant

Extending boot life

All Steel Blue boots are water-resistant and perfect for work environments with light water exposure. We use waterproof soles along with premium quality leathers and materials that are treated to repel moisture. This reduces foot odour and bacteria while extending the life of your boots.

Waterproof

The best choice for wet and muddy work

Waterproof Steel Blue boots have an extra barrier of seam-sealing tape added during the manufacturing process. This fully prevents moisture penetrating the leather via the stitch holes. The construction of Steel Blue's waterproof work boots includes a premium quality, waterproof leather and are the best choice for wet, muddy environments such as underground mining.

Men's Boots

Argyle®

Argyle® TPU 312102

150mm, lace-up ankle boot with padded collar and tongue.

This boot comes standard with a 200-joule safety steel toe cap and an anti-static TPU outsole, heat resistant to 130°C.

Available in premium, water resistant, full grain (black and winter brown) and nubuck (wheat) leather options.

Women's Sizing

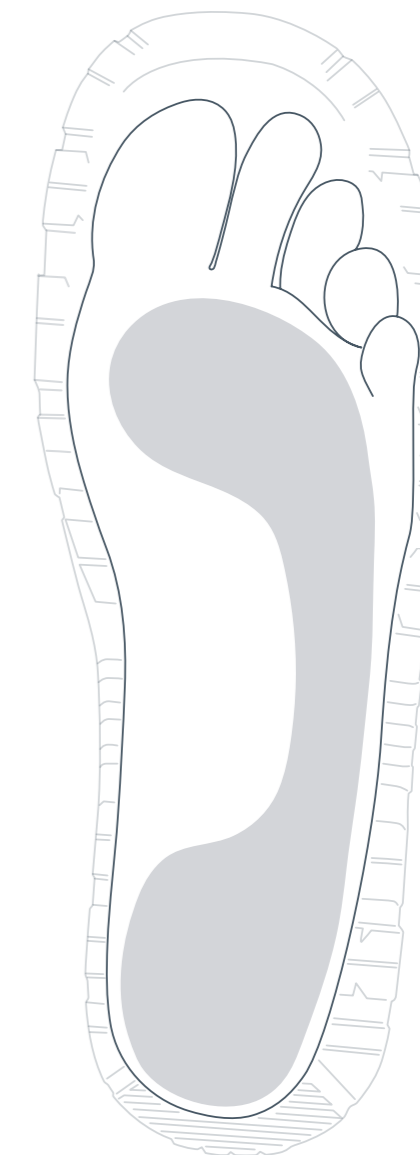

True ladies fit

Our ladies safety boots are designed just for women and include a shorter ankle-length and smaller instep.

Most industrial footwear is made for men, with women wearing smaller versions of men's ranges, but women's feet are anatomically different and not just a scaled down version.

Steel Blue is the leading safety brand that tailors boots to complement the shape of ladies feet with a true ladies last.

| AUS / NZ | UK | USA | EU | Millimetre |
|----------|----|-----|----|------------|
| 4 | 2 | 4 | 35 | 215 |
| 5 | 3 | 5 | 36 | 223 |
| 6 | 4 | 6 | 37 | 231 |
| 7 | 5 | 7 | 38 | 239 |

| 10 | 8 | 10 | 42 | 264 |
| 11 | 9 | 11 | 43 | 273 |

- + Shallower first toe
- + Shorter length from ball of foot to heel
- + Smaller instep length and circumference
- + Shorter ankle length

Boot Fitting Guide

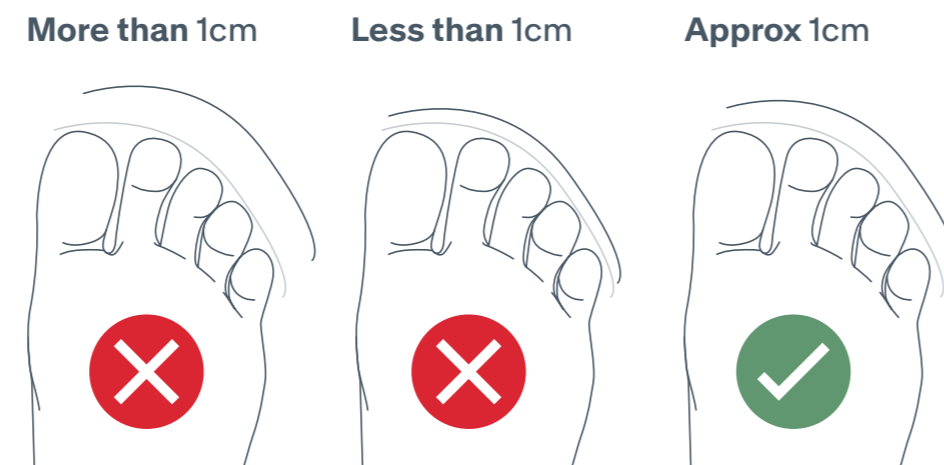

A properly fitted work boot is important for good foot and overall body health. All Steel Blue work boots are endorsed by the Australian Physiotherapy Association (APA).

To support your customer's physical wellbeing, we have collaborated with the APA to help fit your Steel Blue work boots for 100% comfort.

How to get a true fit

- + Measure your feet. Your foot size and shape can change over time. Don't rely on the fact that you have always worn a certain size.
- + Check the width of the boot. Half sizes are designed to accommodate a wider foot.
- + Fit your boots to the larger foot. Most people have one foot that is larger than the other, so make sure you measure both feet.
- + Get measured at the end of the day when your feet are the largest.
- + Don't plan on the boot stretching over time. They should fit well when you buy them.
- + Check the depth of the boot to ensure there is sufficient room for your toes
- + Always stand and walk around in the boots to see if they are comfortable, fit well, and don't chafe or rub.

- + Wear thick socks when trying on the boots like Steel Blue's Bamboo Socks. Most boots are made to be worn with thick socks.

Check the space at the end of the boot. Stand up and make sure there is 1cm (about the width of your finger) between your longest toe (usually the second toe) and the end of the boot.

Setting the standard in safety

We've been on the front-foot of safety and comfort from the start. It's how we support skilled workers to be their best.

Steel Blue's industry leading product advancements include:

Trisole® Comfort Technology, a multilayer sole for superior cushioning and shock absorption

Composite toe cap, the airport-friendly and lightweight alternative to steel caps

Premium long-lasting leather, that's all ethically sourced

Zip-sided boots, quick to remove and put back-on

Lightweight boots, to reduce foot fatigue

Ladies fit; a true ladies fit specifically designed for women's feet

Anti-chaff lining, that's custom made by leading industrial manufacturers

PORON®, a key part of our Trisole® Comfort Technology

Certified safe, receiving European Safety Footwear Certification EN ISO 20345 and USA Safety Footwear Certification ASTM F2413 while complying with Australian Safety Footwear Standard AS 2210.3 as the benchmark in safety boots

Steps towards a sustainable future

Steel Blue's sustainability roadmap, In Our Stride, is a step in the right direction, outlining Steel Blue's journey towards achieving social responsibility. Our goals are aligned to the UN Sustainable Development Goals with a focus on community, climate, environment, human rights, and diversity & inclusion.

By 2025, Steel Blue has committed to:

+ **Community**

Steel Blue will have provided over A\$2 million in donations and support to community organisations and projects

+ **Diversity & inclusion**

A third of Steel Blue's workforce will be female

+ **Environment**

Steel Blue will be a carbon-neutral organisation

+ **Climate**

Steel Blue will source our leather exclusively from LWG gold-rated suppliers

+ **Human rights**

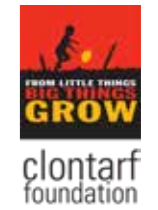

Steel Blue will have eliminated any risk of modern slavery within our supply chain

A mark of true support

Steel Blue is extremely proud of our many longstanding relationships with charitable and community organisations including:

Our impact so far on communities

- + More than \$2 million to support awareness and early detection of breast cancer in partnership with Breast Cancer Care WA.
- + More than \$450,000 for mental health charity Beyond Blue, funding their 24/7 Support Service.
- + Partnering with Clontarf Foundation to mentor young Aboriginal and Torres Strait Islander men.
- + Supporting the Swan Districts Football Club outreach programs, helping marginalised and at-risk people.
- + Sponsoring the SSB Annisa Pratama soccer academy near our factory in Jakarta.
- + Providing footwear and funding for environmental disaster recovery initiatives through WA Charity Direct.
